ACCESSARY OF ENDOSCOPE AND ENDO-
SCOPE

Abstract:

PURPOSE: To provide an accessory of an endoscope and an endoscope by achieving solutions to meet requirements for easy observation of intestinal inside, easy detection of a hooking location of a viewing tube, easing of pains such as excessive expansion of stomach, minimizing of hazard of perforation, elimination of fatality caused by anesthetic, narcotic or the like, and elimination of overlooking lesions.

CONSTITUTION: A balloon 3 is arranged detachably in the perimeter of the tip of a viewing tube 2 in such a manner as not to block a field of view and an airing pipe 4 is mounted detachably on the viewing tube 2 so as to feed air to or discharge it from the balloon 3 from the external end side of the viewing tube 2. A pipe 5 for suction is provided detachably on the viewing tube 2 so as to discharge air, excreta or the like existing immediately behind the balloon expanded within an intestine.
